

**Karolinska
Institutet**

General description of SAML2 WebSSO at Karolinska Institutet

The service provides authentication of users which have an electronic identity at Karolinska Institutet, together with release of attributes pertaining to the authenticated user. The provider of the service/centre of learning is a member of SWAMID, the Swedish identity federation for Research and higher education. The service has been deployed in accordance with SWAMID's rules and regulations and encompassing rules and guidelines which have been laid down by SWAMID.

Rules and Regulations for personal integrity

The service adheres to the rules and regulations for the handling of personal data which has been published by Karolinska Institutet in accordance with Swedish law.

The service and limitations of service

Karolinska Institutet undertakes to guarantee the availability of the service in accordance with Karolinska Institutet's requirements. Karolinska Institutet follows SWAMID's recommendations for release of attributes based upon entity categories. Karolinska Institutet reserves the right to change the actually released attributes, having communicated such with a service provider, regardless of the recommendations from SWAMID concerning the entity category the service provider has been placed in.
