

Central Administration

Registration of safety representatives 2017-2019

According to the Work environment ordinance section 10, a registration of appointed safety representatives shall be sent to the employer as soon as possible after the election. This is done by the trade union or the employees that have administered the election. Safety representatives are appointed for a three year period. The mandate is the same regardless when a person enters or leaves the assignment. When the mandate ends the safety representative is removed from the register.

Information on the safety representative			
Name			
Title
